

# Aurison Pro

## Wireless AI Handheld Ultrasound

# Unplugged Precision: Aurison's Mobile Power

Use Aurison Pro independently with the Aurison Mobile App on any Android smartphone/tablet. Our wireless transducer liberates clinicians from cords and cramped spaces while maintaining high-performance scanning capabilities wherever care is needed.

## Confident Performance with Every Scan

- Scanning modes: B-mode, M-mode, Color Doppler, Power Doppler, PW, and Tissue Doppler Imaging
- Dedicated presets for Cardiac, Abdomen, Lung, Transcranial Imaging (TCI), Emergency Medicine (EM), Trauma (FAST), EM Abdominal Aortic Aneurysm (AAA), Bladder, OB/GYN, and Vascular

# Unleashing Clinical Freedom

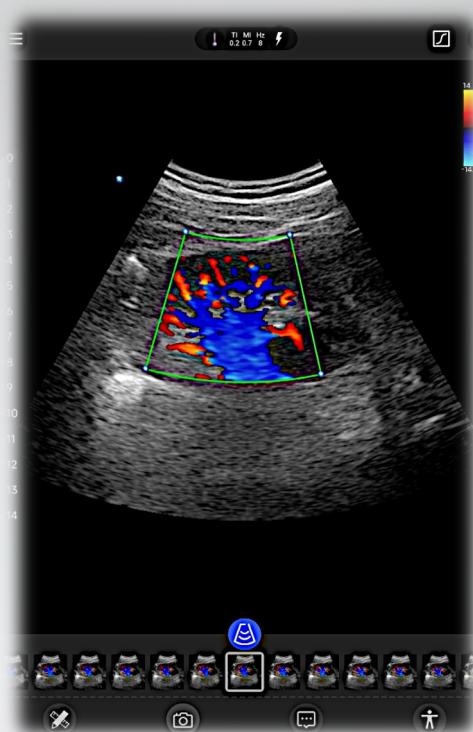

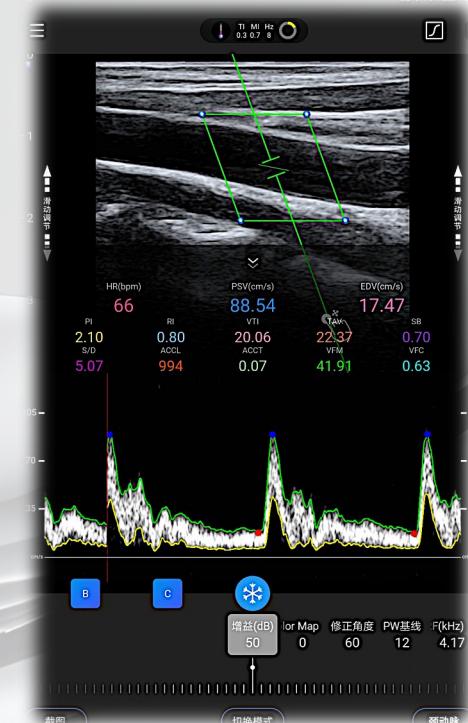

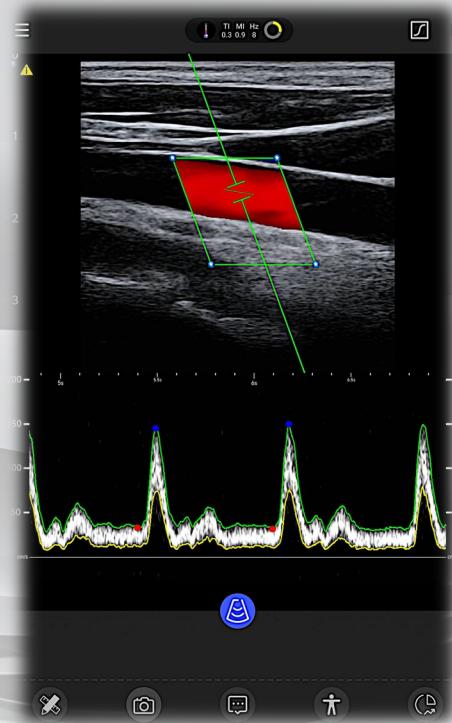

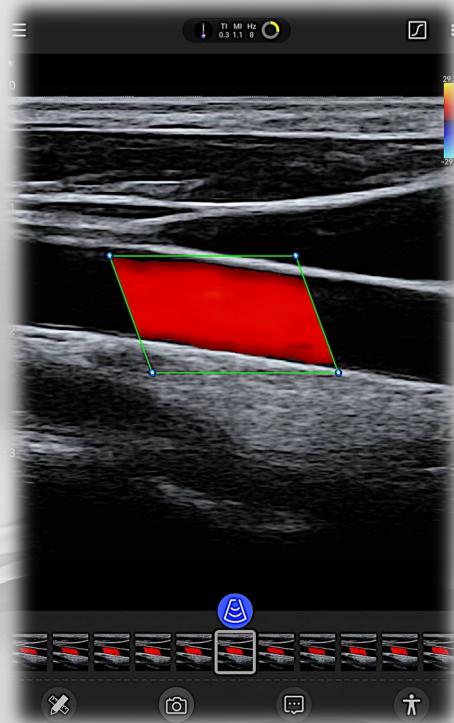

Point-of-Care Ultrasound (POCUS) is indispensable for rapid patient assessment in high-stakes settings like ERs, ICUs, remote clinics, and emergency evacuations. As demand grows for high-quality portable imaging, Aurison delivers the solution: wireless transducers compatible with both AI ultrasound systems *and* mobile devices.

Engineered exclusively for wireless versatility, Aurison transducers empower clinicians to perform confident, efficient diagnostics—untethered from carts, whether at the bedside or beyond hospital walls.

# Clinical Gallery

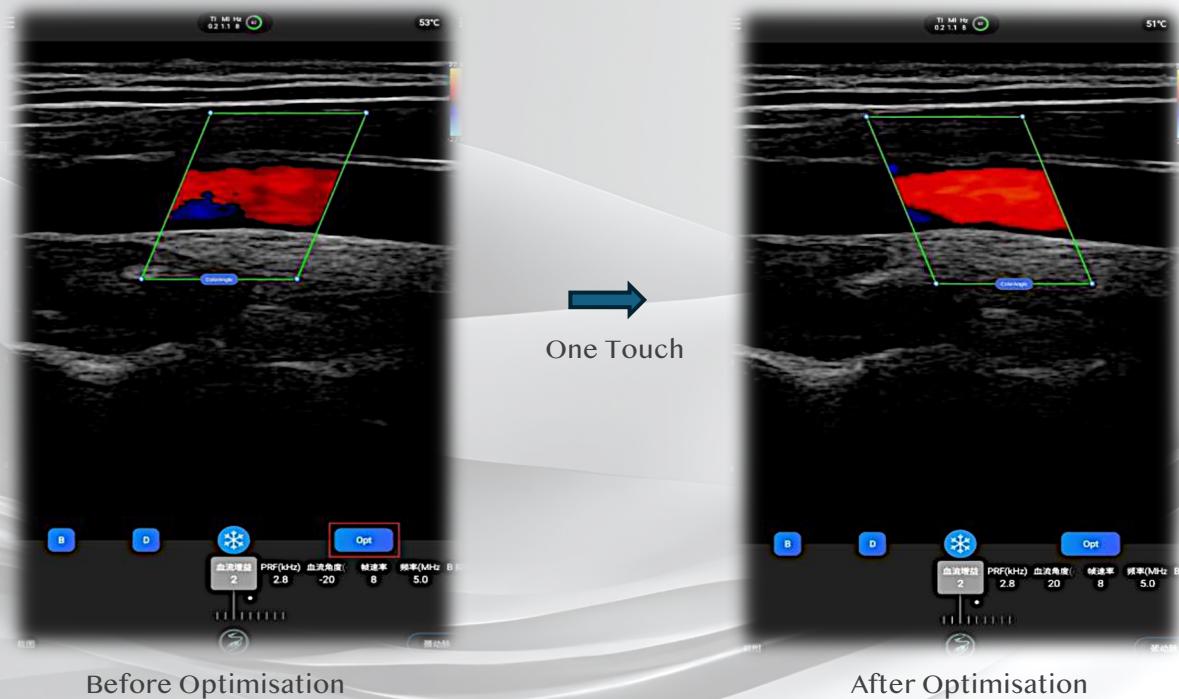

Powered by Deep Learning Reconstruction and AI-Powered Beamforming technology, the Aurison Pro delivers high-quality images with excellent resolution, enabling clinicians to make confident decisions at the bedside.

# AI Image Modification Technology

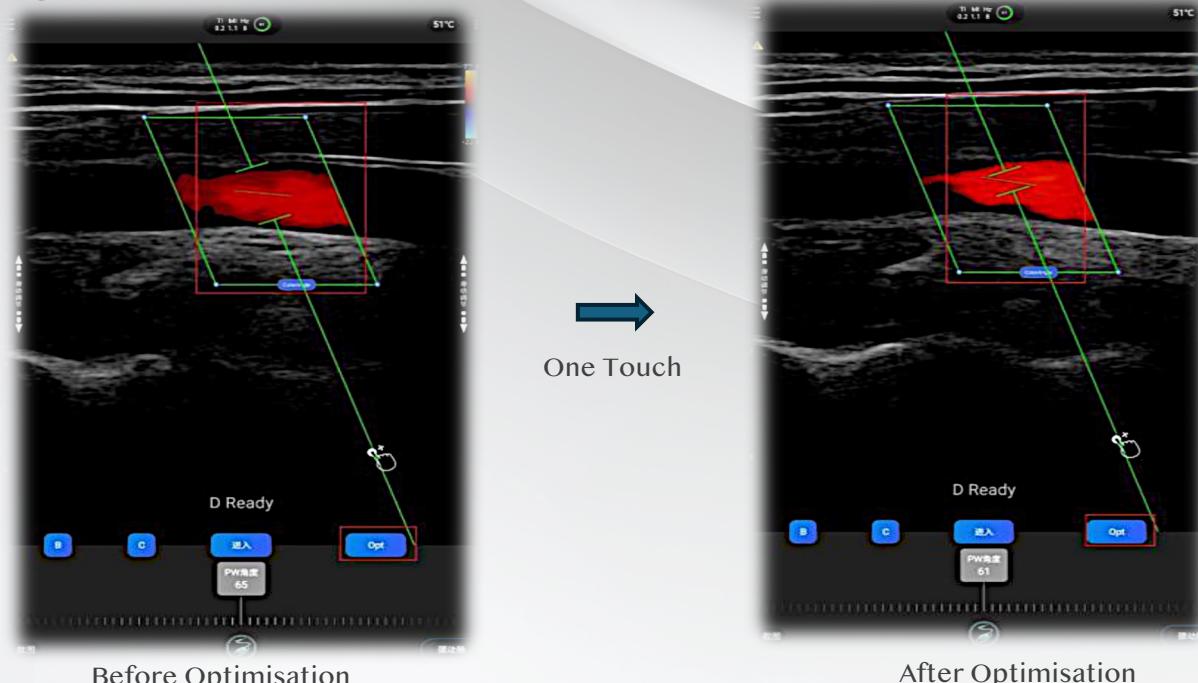

Experience enhanced ultrasound imaging with Aurison Pro. Our AI Image optimisation engine boost image quality, delivering crystal-clear, optimised visuals for confident diagnosis, powered by intelligent AI.

## One Touch Blood Flow Analysis

Auto-aligns angle and position for optimal flow visualization after B-mode vessel placement. If anatomy shifts, the one-click 'Opt' button instantly recalculates the best settings, eliminating manual adjustments and ensuring optimal flow state.

## Intelligent Doppler Made Simple

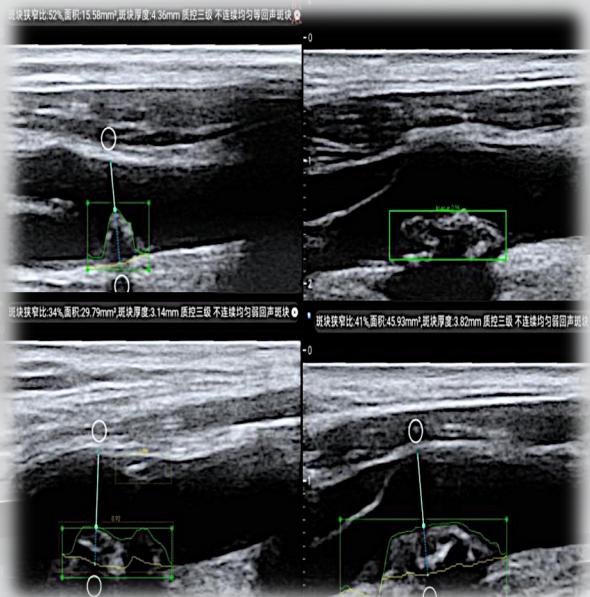

Automatically optimizes angle, gate position, and steer angle upon entry. If anatomy shifts, the one-click 'Opt' button instantly recalculates optimal settings for accurate velocity measurement, eliminating complex manual adjustments.

# Instant AI Diagnosis

The Aurison AI Auto Diagnostic engine automatically flags potential pathologies with medical evidence support. Gain real-time, AI-driven insights for faster detection and enhanced diagnostic accuracy during examinations.

## AI Vascular Plaque Intelligence

Automated Plaque Detection

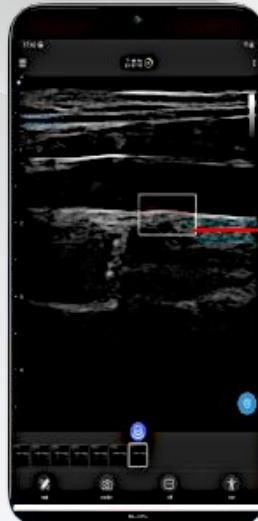

Plaque Analysis

Identifies elusive plaques automatically. Uniquely integrates imaging, biochemical & clinical data with AI for guideline-based risk grading, providing critical decision support for timely intervention.

## Advanced AI Carotid IMT Analysis

Real time Navigation

AI measurement

AI assessment

Real-time identification during scanning ensures no thickened areas are missed. Automatically measures all IMTs in the loop, pinpointing the true maximum thickness. AI then evaluates risk using age, gender & side-specific data for precise, experience-independent assessment.

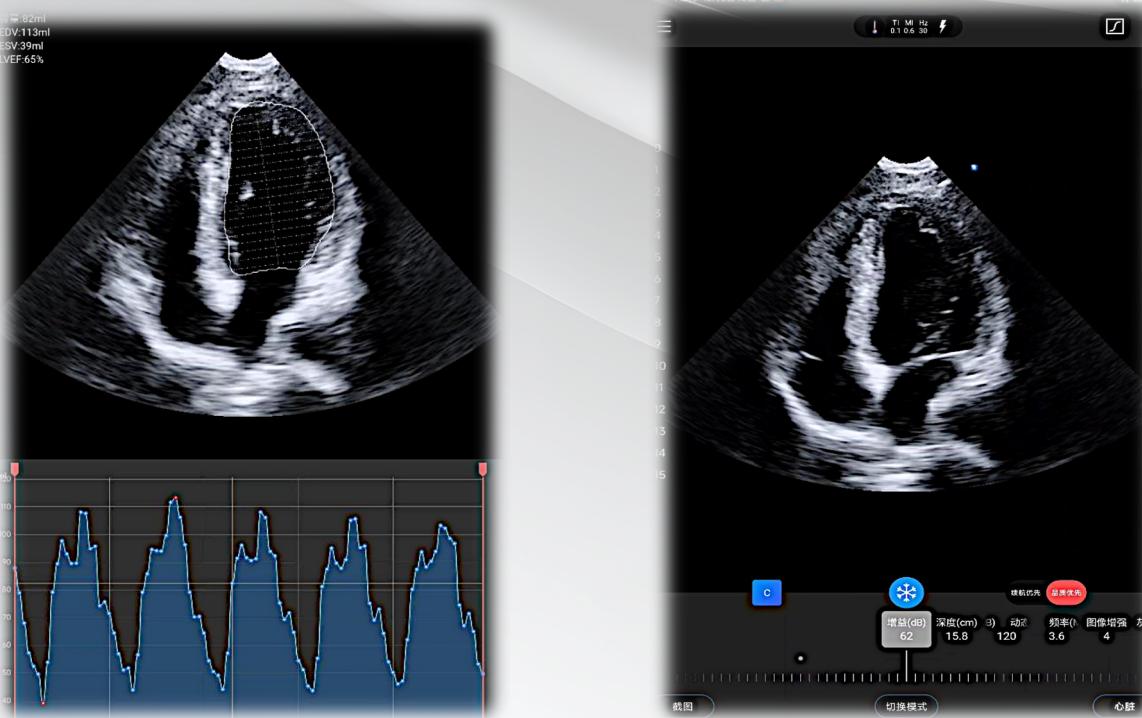

# Automate Tissue Analysis with Aurison Pro

Our AI Auto Tissue System instantly detects and measures anatomical structures with medical-grade accuracy. Backed by evidence-based algorithms, it delivers standardized, reliable results—reducing variability and enhancing diagnostic confidence at the point of care

## AI Fat and muscle layer automatic recognition

## AI-Powered Cardiac Assessment

Automates LVEF measurement by analyzing continuous heartbeats. Delivers rapid, accurate ejection fraction results—empowering frontline clinicians to efficiently screen for cardiac dysfunction and accelerate triage of at-risk patients.

# Peace of Performance Assurance

## Continuous Innovation

Software-based technology platform enables effortless upgrades, pushing performance boundaries long after purchase. With Aurison, your system evolves alongside advancements, guaranteeing lifelong imaging excellence and peace of mind.

## Standard Warranty Coverage

The Aurison Standard Warranty\* provides the following for one (1) year from the date of purchase:

- **Hardware Components:** Coverage for the main system and associated parts against manufacturing defects.
- **Technical Support:** Access to assistance through local authorised distributors.
- **Transducer Reliability:** Protection for standard transducers under conditions of normal wear or operational failure.
- **Software performance updates with the Aurison platform.**

### Terms & Conditions:

1. Valid exclusively for systems purchased through Official Aurison Authorised Distributors.
2. Warranties for purchases from non-authorised agents are not standardised and may differ.
3. Extended coverage options are available through upgradable warranty packages.

### Transducers

P10 Convex Probe  
P20 Linear Probe  
P30 Phased array Probe  
P40 Micro-convex Probe  
P50 High frequency linear probe

### Battery

1.5+ hours (working time)

### Weight

200-240g

AURISON Pro P10

AURISON Pro P20

AURISON Pro P30
